

## 2010年(平成22年)

### 【原著】

1. Kawai T, Kaminou T, Sugiura K, Hashimoto M, Ohuchi Y, Adachi A, Fujioka S, Ito H, Nakamura K, Ihaya T and Ogawa T.  
Percutaneous radiofrequency lung ablation combined with transbronchial saline injection: an experimental study in Swine.  
*Cardiovasc Intervent Radiol* 33 (1): 143-149, 2010.
2. Saito M, Shimizu S, Kinoshita Y, Satoh I, Shomori K, Dimitriadis F and Satoh K.  
Bladder dysfunction after acute urinary retention in the rats: a novel over active bladder model. *Mol Cellular Biochem* 333 (1-2): 109-114, 2010.
3. Uchida M, Tsukamoto Y, Uchida T, Ishikawa Y, Nagai T, Hijiya N, Nguyen LT, Nakada C, Kuroda A, Okimoto T, Kodama M, Murakami K, Noguchi T, Matsuura K, Tanigawa M, Seto M, Ito H, Fujioka T, Takeuchi I and Moriyama M.  
Genomic profiling of gastric carcinoma in situ and adenomas by array-based comparative genomic hybridization. *J Pathol* 221 (1): 96-105, 2010.
4. Osaki M, Shomori K, Nosaka K, Haruki T, Teshima R and Ito H.  
Prognostic significance of Minichromosome maintenance protein 7 and Geminin expression in patients with 109 soft tissue sarcomas.  
*Oncol Lett* 1 (4): 703-709, 2010.
5. Tamura T, Shomori K, Haruki T, Nosaka K, Hamamoto Y, Shiomi T, Ryoike K and Ito H.  
Minichromosome maintenance-7 and geminin are reliable prognostic markers in patients with oral squamous cell carcinoma: immunohistochemical study.  
*J Oral Pathol Med* 39 (4): 328, 2010.
6. Shomori K, Nishihara K, Tamura T, Tatebe S, Horie Y, Nosaka K, Haruki T, Hamamoto Y, Shiomi T, Nakabayashi M and Ito H.  
Geminin, Ki67, and minichromosome maintenance 2 in gastric hyperplastic polyps, adenomas, and intestinal-type carcinomas: pathobiological significance.  
*Gastric Cancer* 13 (3): 177-185, 2010.

### 【症例報告】

1. Nakabayashi M, Shomori K, Kiya S, Shiomi T, Nosaka K and Ito H.  
Tubular-Trabecular Type Basal Cell Adenoma of the Parotid Gland: A Patient Report.  
*Yonago Acta Medica* 53 (3): 65-69, 2010.
2. Haruki T, Nakamura H, Taniguchi Y, Miwa K, Adachi Y, Fujioka S, Shomori K and Ito H.  
Spontaneous regression of lung adenocarcinoma: Report of a case.  
*Surg Tod* 40 (12): 1155-1158, 2010.
